Section No. 7
Bulletin No. 14

MODEL(S): P52 plus, P62
SUBJECT: 507 433289 Wrist Pin Bearing
SERIAL NUMBER(S) AFFECTED: N/A

We are pleased to introduce a redesigned top end bearing. After initial problems with cage breakage on the old wrist pin bearing cage design we have introduced the bearing using a solid machined cage. This new bearing (P/N 507 433289) has the advantages of tighter tolerances, higher quality material and a solid (one piece) machined cage. Please ensure it is used when replacing the wrist pin bearing on all older P50, P51, P52, P52 plus, P61 and P62 models. Engineering testing has proven its superior reliability.
